Immerse yourself in a world rife with physical and psychological confrontations that spans half the globe and five hundred years. Take a journey that goes from present day America to the Spanish conquest of the New World; then to the plundering of the Caribbean by French pirates and finally back to the present day. Follow the lives of unassuming heroes and unlikely villains as they struggle with the basest of human emotions and are compelled by an unseen force which thrusts them into unexpected actions. Discover the hidden power that rules and ruins their lives. The searing memoir of an extraordinary woman who served as a nun for eleven years in Mother Teresa's order, *Hope Endures* is a compelling chronicle of idealistic determination, rigid discipline, and shattering disillusionment. In *Her* life's journey from

certainty to doubt, Colette Livermore enters the Missionaries of Charity order in 1973 with unwavering faith and total surrender of *Her* will and intellect after seeing a documentary on the order's work in India. Only eighteen at the time, Livermore has been studying to enter medical school -- a lifelong goal -- but virtually overnight severs her many ties with family, friends, and the life she's known in beautiful, rural New South Wales in order to train as a sister to aid the poor. In the process, she also gives herself over to the order's unexpectedly severe, ascetic regime, which demands blind obedience and submission. Given the religious name Sister Tobit, Livermore serves in some of the poorest places in the world -- the garbage dump slums of Manila, Papua New Guinea, and Calcutta -- bringing hope and care to people who are desperately ill, hungry, abandoned, and even dying, and comforting whomever she can. Although she draws inspiration and

strength from her humanitarian work, Livermore and other nuns risk their own physical health, as they are sent to dangerous areas while being unschooled in the languages and cultures, untrained in medical care, and sometimes unprotected by vaccines. Livermore herself succumbs to bouts of drug-resistant cerebral malaria that almost kill her and to a new strain of hepatitis. Over time she also begins to notice that the order's rigid insistence on unquestioning obedience harms the young sisters mentally, emotionally, and spiritually -- and she experiences a terrible inner struggle to find the right path for herself. As she tries to respond to the suffering around her, she often falls into an incomprehensible conflict between her vow to obey and her vow to serve, between religious strictures and the practice of compassion, between authority and personal conscience. Pressured to stay with the order by Mother Teresa and other

superiors, as well as by the younger nuns, Livermore nonetheless decides to leave at age thirty and attain her medical degree, continuing to take health care and relief to impoverished people in remote areas -- the isolated aboriginal communities of the Outback and war-torn East Timor. Even as she serves others as a medical doctor, she continues in a crisis of faith that eventually leads her to become an agnostic. Hope Endures is the eye-opening, deeply affecting story of a brave woman's search for meaning in a world that is rent with tragedies and contradictions. It is also an unflinching critique of any faith that insists on blind obedience. For true hope to endure, Dr. Livermore demonstrates, we must always strive to question, to face the hard truths, and to discover the courage to follow our convictions. Throughout human history, thoughtful people have recognized three fundamental truths: the existence of God . . . the corruption of human nature . . .

and a moral law. Yet, like potent chemicals these three ingredients are seldom combined. Why are they kept in isolation? This book provides a convincing answer. When taken together, they lead inevitably to a disturbing conclusion. National Outdoor Book Awards Winner Winner of the BANFF Adventure Travel Award “A thrilling and harrowing story. If it’s a cliché to say I couldn’t put this book down, well, too bad: I couldn’t put this book down.” —Jess Walter, bestselling author of Beautiful Ruins “Polar exploration is utter madness. It is the insistence of life where life shouldn’t exist. And so, Labyrinth of Ice shows you exactly what happens when the unstoppable meets the unmovable. Buddy Levy outdoes himself here. The details and story are magnificent.” —Brad Meltzer, bestselling author of The First Conspiracy: The Secret Plot to Kill George Washington Based on the author's exhaustive research, the incredible true story of the Greely Expedition,

one of the most harrowing adventures in the annals of polar exploration. In July 1881, Lt. A.W. Greely and his crew of 24 scientists and explorers were bound for the last region unmarked on global maps. Their goal: Farthest North. What would follow was one of the most extraordinary and terrible voyages ever made. Greely and his men confronted every possible challenge—vicious wolves, sub-zero temperatures, and months of total darkness—as they set about exploring one of the most remote, unrelenting environments on the planet. In May 1882, they broke the 300-year-old record, and returned to camp to eagerly await the resupply ship scheduled to return at the end of the year. Only nothing came. 250 miles south, a wall of ice prevented any rescue from reaching them. Provisions thinned and a second winter descended. Back home, Greely’s wife worked tirelessly against government resistance to rally a rescue mission. Months passed, and Greely made a drastic choice:

he and his men loaded the remaining provisions and tools onto their five small boats, and pushed off into the treacherous waters. After just two weeks, dangerous floes surrounded them. Now new dangers awaited: insanity, threats of mutiny, and cannibalism. As food dwindled and the men weakened, Greely's expedition clung desperately to life. *Labyrinth of Ice* tells the true story of the heroic lives and deaths of these voyagers hell-bent on fame and fortune—at any cost—and how their journey changed the world. Manhattan Institute fellow Robert Bryce's personal, idiosyncratic style fuels an important argument. He celebrates innovation, technology and freedom as the answers to environmental concerns, repeatedly illustrating potential solutions that many of those forecasting climate calamity don't mention, while suggesting what humanity's future could and should be. In this urgent if reductive treatise, he proves an eccentric contrarian. His sort

of random capitalization - things aren't faster, they are Faster - can irritate, and rather than answer objections or counterarguments, Bryce tends to just elude them, but he consistently remains intriguing. While always neutral politically, *getAbstract* suggests Bryce's optimistic look ahead to all those interested in the environment, the future and how innovation builds on itself. An epic, award-winning biography of Malcolm X that draws on hundreds of hours of personal interviews and rewrites much of the known narrative. Les Payne, the renowned Pulitzer Prize-winning investigative journalist, embarked in 1990 on a nearly thirty-year-long quest to create an unprecedented portrait of Malcolm X, one that would separate fact from fiction. The result is this historic, National Book Award-winning biography, which interweaves previously unknown details of Malcolm X's life—from harrowing Depression-era vignettes to a moment-by-

moment retelling of the 1965 assassination—into an extraordinary account that contextualizes Malcolm X's life against the wider currents of American history. Bookended by essays from Tamara Payne, Payne's daughter and primary researcher, who heroically completed the biography after her father's death in 2018, *The Dead Are Arising* affirms the centrality of Malcolm X to the African American freedom struggle. The New York Times best-selling sequel to "Surely You're Joking, Mr. Feynman!" One of the greatest physicists of the twentieth century, Richard Feynman possessed an unquenchable thirst for adventure and an unparalleled ability to tell the stories of his life. "What Do You Care What Other People Think?" is Feynman's last literary legacy, prepared with his friend and fellow drummer, Ralph Leighton. Among its many tales—some funny, others intensely moving—we meet Feynman's first wife, Arlene, who taught him of love's irreducible mystery as she lay

dying in a hospital bed while he worked nearby on the atomic bomb at Los Alamos. We are also given a fascinating narrative of the investigation of the space shuttle Challenger's explosion in 1986, and we relive the moment when Feynman revealed the disaster's cause by an elegant experiment: dropping a ring of rubber into a glass of cold water and pulling it out, misshapen. THIS BOOK DESCRIBES THE HEALTH SEX WITH MATE IN ANT TIME AND ANYWHERE IN THE WORLD. A gorgeous memoir about the 17 year estrangement of the author and her homeless schizophrenic mother, and their reunion. THIRST is a living testimony of the author of God's promise in Acts 1: 8 on the empowerment of the Holy Spirit to make believers witnesses for Him in their own locality, and indeed, all over the world. Born in a remote village in South India, her first knowledge of God came through a picture of Jesus with John 3: 16 printed at the back, given to her as a

small child by a British missionary. A temporary spiritual set back occurred after the death of her beloved father, but her undying thirst for God and the encounter with the Giver of the living waters resulted in rivers flowing freely from within her blessing those around her. This book will satisfy all who have a longing for spiritual growth, for all lovers of Christ Jesus and the wonderful paths in which He leads His children. The unquenchable thirst that the author had to be filled with the gifts of the Holy spirit became her life experience which she deserves to pass on to her readers in words of simplicity and grace, each chapter dealing with a specific gift. 'a smart, daring and refreshing book.' - Weekend Australian 'deliciously sinister' - Herald Sun Why would anyone join a cult? Maybe they're unhappy with their current religion, or they want to change the world, or they're disappointed with their lives and want to find something bigger or holier that makes sense of this confusing,

chaotic and dangerous world. Or maybe they just want to give themselves the best possible chance of having sex with aliens. Whatever the reason, once people are in, it's usually very difficult for them to leave. Cults have ways of making their followers do loopy, dangerous stuff to prove their loyalty, and in return they get a chance to feel secure within the cult's embrace, with an added bonus of being utterly terrified of the outside world. From the tragic JONESTOWN Kool-Aid drinkers to the Australian cult THE FAMILY to the fiery Waco climax of THE BRANCH DAVIDIANS, this book is a wide-sweeping look at cults around the world, from the host of the popular podcast ZEALOT. Traces the story of a former nun who devotedly worked alongside Mother Teresa in service to the world's poor, describing her teenage decision to enter a convent, the struggles she faced as an independent thinker and her decision to leave the church after 20 years. 50,000 first printing. The Industrial Revolution was previously understood as having awakened an enormous, unquenchable thirst for material consumption. People up and down the social order had discovered and were indulging in the most extraordinary passion for consumer merchandise in quantities and varieties that had been unimaginable to their parents and grandparents. It was indeed a revolution, but a consumer revolution at the start. In Face Value, Cary Carson expands and updates his groundbreaking earlier work to address the intriguing question of how Americans became the world's consummate consumers. Prior to the rise of gentry culture in eighteenth-century North America, there was still a

decided sameness to people's material lives. About mid-century, though, a lust for fancy goods, coupled with social aspiration, began to transform American society. Carson here addresses the intriguing question of how Americans developed the reputation for avid consumption. Both elegantly written and engagingly argued, the book reveals how the rise of the gentry culture in eighteenth-century North America gave rise to a consumer economy. Freshwater shortages will affect 75% of the world's population by 2050. Mithen puts this crisis into context by exploring 10,000 years of water management. Thirst tells of civilizations defeated by the water challenge, and of technological ingenuity that sustained communities in hostile environments. Work with nature, not against it, he advises. An inside view of China's quest to become a global wine power and Bordeaux's attempt to master the thirsty dragon it helped

create The wine merchants of Bordeaux and the rising entrepreneurs of China would seem to have little in common—old world versus new, tradition versus disruption, loyalty versus efficiency. And yet these two communities have found their destinies intertwined in the conquest of new markets, as Suzanne Mustacich shows in this provocative account of how China is reshaping the French wine business and how Bordeaux is making its mark on China. *Thirsty Dragon* lays bare the untold story of how an influx of Chinese money rescued France's most venerable wine region from economic collapse, and how the result was a series of misunderstandings and crises that threatened the delicate infrastructure of Bordeaux's insular wine trade. The Bordelais and the Chinese do business according to different and often incompatible sets of rules, and Mustacich uncovers the competing agendas and little-known actors who are transforming the economics

and culture of Bordeaux, even as its wines are finding new markets—and ever higher prices—in Shanghai, Beijing, and Hong Kong, with Hong Kong and London traders playing a pivotal role. At once a tale of business skullduggery and fierce cultural clashes, adventure, and ambition, *Thirsty Dragon* offers a behind-the-scenes look at the challenges facing the world's most famous and prestigious wines. Annotation. Ruth A. Morgan completed her PhD at The University of Western Australia in 2012 and took up a lecturing position at Monash University in the School of Philosophical, Historical and International Studies. Her doctoral thesis was awarded the 2013 Margaret Medcalf Prize by the State Records Office of Western Australia for excellence in reference and research, and shortlisted for the Australian Historical Association's Serle Award for the best postgraduate thesis in Australian History. In 2013, Morgan was a visiting scholar at the Bill Lane Center for the

American West at Stanford University. She has presented at international conferences at Renmin University in Beijing (co-sponsored by the Rachel Carson Center for Environment and Society); the Australian Historical Association in Wollongong; the European Society for Environmental History in Munich; and the International Water History Conference in Montpellier. Morgan has recently co-edited a volume of *Studies in Western Australian History* and is currently editing a volume of *History of Meteorology*. She is a member of the Australian Historical Association, the Australian Garden History Association, and the International Commission for the History of Meteorology. She also coordinates the 'Making Public Histories' seminar series, which is a joint initiative with the History Council of Victoria and the State Library of Victoria. Although still in her early career, Morgan has published several dozen articles in peer-reviewed journals, and in

outlets such as *The Conversation and The West Australian*. "In this book, 14 prominent environmental writers address every aspect of the looming crisis. They explore the paradox that, on a blue planet like ours, little of that resource is actually available for use, and offer alarming and persuasive evidence that we are using what we have much faster than it can be replenished - a problem that will only grow worse as the global population grows and the rate of climate change and airborne pollution quickens. They show the dire consequences of current trends, from desertification to epidemic disease to increasingly bitter battles over who "owns" water and how to apportion our dwindling supply."--BOOK JACKET. Understanding the foreign policy agenda and behavior of the Islamic Republic of Iran is a critical challenge for the world. But where do the principal Iranian regime actors come from in terms of political background, experiences and

interests? Which types of ambitions or policy conflicts have dominated and shaped foreign policy debates since 1979? This book explains the internal policy process in Tehran by following two regime personalities, Ali Khamenei, the Supreme Leader, and Akbar Hashemi Rafsanjani, who before his death in January 2017 held some of the most powerful political positions in Iran. No two men have been more influential in dictating the regime's decision-making processes since 1979. Yet little is known about how their competing worldviews and interests, their key moments of dispute – both personal or policy-based – or their personal ambitions have informed the trajectory of Iranian politics. The book analyzes Khamenei and Rafsanjani's own words and writings - and accounts of them given by others - to reveal how the domestic policy contest has shaped Tehran's actions on the regional and international stage. Comprising primary and secondary Iranian

sources - including untapped memoirs, newspaper reports, and Iranian electronic media and personal interviews - the book highlights the principal rivalries over the lifespan of the Islamic Republic and offers new insights into the present and future of Iranian foreign policy. “Psychological slavery is a kind of enslavement through which a great number of people give up their soul to a third party” (Author unknown). The heroine of this book is one of them. In her quest for spiritual growth, Lisbeth allowed a man to take control over her life. She was manipulated near the point of getting out of her mind and soul. In the process, she lost her own true values, her self-esteem, her material belongings and her daughters. After going through the darkest night of her life, the most exhausting struggle toward illusive well-being, on the edge of losing her own life when the noose was so tight

she could hardly breathe, Lisbeth screamed for help! Her own inner light then came up to her rescue and showed her the right way to the source, her own source. This book is about an declaration of love to a wonderful woman in a classic sonnet style, in tradition, which goes all the way up to Francesco Petrarke, William Shakespeare, Ronsar, Bodler, Verlen and other famous masters of this genre. And live a day...This book is about many areas of life of humans, the full range of feelings experienced by each of us, but its leitmotif is love in all its faces. In the middle of the Mojave Desert, Las Vegas casinos use billions of gallons of water for fountains, pirate lagoons, wave machines, and indoor canals. Meanwhile, the town of Orme, Tennessee, must truck in water from Alabama because it has literally run out. Robert Glennon captures the irony—and tragedy—of America’s water crisis in a book that is both frightening and wickedly comical. From manufactured snow for tourists

in Atlanta to trillions of gallons of water flushed down the toilet each year, Unquenchable reveals the heady extravagances and everyday inefficiencies that are sucking the nation dry. The looming catastrophe remains hidden as government diverts supplies from one area to another to keep water flowing from the tap. But sooner rather than later, the shell game has to end. And when it does, shortages will threaten not only the environment, but every aspect of American life: we face shuttered power plants and jobless workers, decimated fisheries and contaminated drinking water. We can't engineer our way out of the problem, either with traditional fixes or zany schemes to tow icebergs from Alaska. In fact, new demands for water, particularly the enormous supply needed for ethanol and energy production, will only worsen the crisis. America must make hard choices—and Glennon's answers are fittingly provocative. He proposes market-based solutions that

value water as both a commodity and a fundamental human right. One truth runs throughout Unquenchable: only when we recognize water's worth will we begin to conserve it.
