[Mixed-Mode Modelling: Mixing Methodologies](#)
[For Organisational Intervention](#) Nov 23 2022
The 1980s and 1990s have seen a growing
interest in research and practice in the use of
methodologies within problem contexts
characterised by a primary focus on technology,
human issues, or power. During the last five to
ten years, this has given rise to challenges
regarding the ability of a single methodology to
address all such contexts, and the consequent
development of approaches which aim to mix
methodologies within a single problem situation.
This has been particularly so where the situation
has called for a mix of technological (the so-
called 'hard') and human centred (so-called
'soft') methods. The approach developed has
been termed mixed-mode modelling. The area of
mixed-mode modelling is relatively new, with the
phrase being coined approximately four years
ago by Brian Lehaney in a keynote paper
published at the 1996 Annual Conference of the
UK Operational Research Society. Mixed-mode
modelling, as suggested above, is a new way of
considering problem situations faced by
organisations. Traditional technological
approaches used in management science have
suffered criticisms relating to their adequacy in
the past few decades, and these hard
approaches have been replaced by soft methods,
which consider process more relevant than
outcome. However, the sole use of human
centred approaches to organisational problems
has also proved to be inadequate. Mixed-mode
modelling accepts the importance of both
process and outcome, and provides enabling

mechanisms for hard and soft investigation to be undertaken.

Tackling Health Inequalities Aug 08 2021
Tackling Health Inequalities: Lessons from International Experiences provides a unique perspective on health inequalities in Canada and elsewhere. This exciting new volume brings together experiences from seven wealthy developed nations -- the United States, Australia, Britain and Northern Ireland, Canada, Finland, Norway, and Sweden -- to analyze their contrasting approaches to reducing avoidable health problems. Some nations are successfully responding to health inequalities, but Canada and the United States are not among them. Why is this, and what can we learn from other nations? Through a political economy lens, Tackling Health Inequalities considers how societal structures and institutions shape the distribution of economic, political, and social resources that affect health disparities amongst the population. The volume then goes on to examine how governing authorities come to either confront or ignore these health inequalities and the conditions that create them. Through these illustrations, it encourages governing authorities that are tackling health inequalities to continue their efforts and directs those that are not -- such as in Canada and elsewhere -- towards what must be done. This groundbreaking text shows the primary lessons from these international experiences: that citizens in Canada and elsewhere need to educate themselves about the importance of tackling health inequalities, and then build the political and social movements that will compel governmental authorities to take action. This volume will serve as a rich resource for professionals and general readers interested in health studies, nursing, social work, public policy, and political economy.

Proceedings of the Second Australasian Conference on the Mechanics of Structures and Materials, Held on 25th, 26th, 27th August, 1969 Mar 03 2021

Comparative Perspectives on Communal Lands and Individual Ownership Feb 20 2020
Comparative Perspectives on Communal Lands and Individual Ownership: Sustainable Futures addresses property and land title as central mechanisms governing access to communally-

held land and resources. The collection assesses the effectiveness of property law and tenure models developed around concepts of individual ownership, for achieving long-term environmental and economic sustainability for indigenous peoples and local communities. It explores the momentum for change in the international realm, and then develops a comparative focus across Australia, North America, Africa, Peru, New Zealand and the Pacific region, examining the historical and current impacts of individuation of title on the customary law and practice of indigenous peoples and local communities. Themes of property, privatisation and sustainable communities are developed in theoretical analyses and case studies from these jurisdictions. The case studies throw into sharp relief how questions of land law and resources management should not be separated from wider issues about the long-term viability of communities. Comparative analysis allows consideration of how western models of land tenure and land title might better accommodate the exercise of traditional practices of indigenous peoples and local communities, while still promoting autonomy, choice and economic development. This volume will be of interest to scholars and professionals working in the fields of property law, land reform, policy and planning, indigenous law and customary law, environmental sustainability, development and resource management.

Psychology and Law Mar 15 2022
From the initial investigation of a crime to the sentencing of an offender, many everyday practices within the criminal justice system involve complex psychological processes. This volume analyzes the processes involved in such tasks as interviewing witnesses, detecting deception, and eliciting eyewitness reports and identification from adults and children. Factors that influence decision making by jurors and judges are examined as well. Throughout, findings from experimental research are translated into clear recommendations for improving the quality of evidence and the fairness of investigative and legal proceedings. The book also addresses salient methodological questions and identifies key directions for future investigation.

[Designing and Managing a Research Project](#) Jun

18 2022 *Designing and Managing a Research Project: A Business Student's Guide* is a practical, step-by-step guide that shows business students how to successfully conduct a research project, from choosing the topic to presenting the results. The authors have applied their many years of experience in supervising student projects to provide examples of actual research problems and to offer practical solutions. The inclusion of topics such as supervision, group work and ethics, and both qualitative and quantitative data analysis, along with examples from real student research provide a unique perspective. The new Fourth Edition includes broader types of student project examples, such as an Economics thesis, additional international business cases, increased coverage of Questionnaire Design and Institutional Review Boards, and an integrated case throughout the book on "High Performance Shoes" with supporting materials and data. Additional resources including case studies, PowerPoint slides, and test bank are available on the authors' website at <http://polonskywaller.com>!

Carbon Accounting and Savanna Fire Management Jan 21 2020 In the context of Australia's developing carbon economy, fire management helps to abate emissions of greenhouse gases and is an important means of generating carbon credits. The vast high-rainfall savannas of northern Australia are one of the world's most flammable landscapes. Management of fires in this region has the potential to assist with meeting emissions reduction targets, as well as conserving biodiversity and providing employment for Indigenous people in remote parts of Australia's north. This comprehensive volume brings together recent research from northern Australian savannas to provide an internationally relevant case study for applying greenhouse gas accounting methodologies to the practice of fire management. It provides scientific arguments for enlarging the area of fire-prone land managed for emissions abatement. The book also charts the progress towards development of a savanna fire bio-sequestration methodology. The future of integrated approaches to emissions abatement and bio-sequestration is also discussed.

Career Development as a Partner in Nation

Building Australia May 17 2022 *Career Development as a Partner in Nation Building Australia* details the valuable historical place of career development in contributing to the broad growth of Australian society. It challenges policy makers and practitioners to provide a more sustained national systemic approach.

Australian Social Policy and the Human Services Aug 20 2022 Social policy encompasses the study of social needs, policy development and administrative arrangements aimed at improving citizen wellbeing and redressing disadvantage. *Australian Social Policy and the Human Services* introduces readers to the mechanisms of policy development, implementation and evaluation. This third edition emphasises the complexity of practice, examining the links and gaps between policy development and implementation and encouraging readers to develop a critical approach to practice. The text now includes an overview of Australia's political system and has been expanded significantly to cover contemporary issues across several policy domains, including changes in labour market structure, homelessness, mental health and disability, child protection and family violence, education policy, Indigenous initiatives, conceptualisations of citizenship, and the rights of diverse groups and populations. Written in an engaging and accessible style, *Australian Social Policy and the Human Services* is an indispensable resource for students and practitioners alike.

IE2007: Proceedings of the 4th Australasian Conference on Interactive Entertainment Jul 19 2022

Social Work in Rural Australia Jul 27 2020 Social work practice in a country town or small remote community several hours' drive from the nearest centre is very different from practice in the city. *Social Work in Rural Australia* offers an introduction to the challenges and rewards of professional practice in rural and remote areas. The authors explore the practical implications for social workers in non-urban regions, including teamwork with professionals from other fields, working with various sub-groups in communities and across distance with other social work colleagues, the diversity of rural livelihoods and lifestyles, and increasingly

pressing environmental issues. Social work theories and case studies demonstrate how enabling practice can promote clients' and communities' ability to deal with some of the challenges of housing, youth unemployment, child protection, ageing, mental health, disability and the obstacles faced by Indigenous, migrant and refugee populations, in specific geographical settings. Social Work in Rural Australia encourages students and practitioners towards a holistic and contextual engagement with rural communities in current and newly developing fields of social work practice. 'This accessible text integrates the theory and practice of social work in often overlooked rural and remote regions. The case studies offer students and practitioners practical insights and celebrate rural practice as both unique and enriching.' - Alana Johnson, 2010 Victorian Winner RIRDC Rural Women's Award, Family Therapist and Social Worker

Australia's Rural, Remote and Indigenous Health Feb 14 2022 Australia's Rural, Remote and Indigenous Health 3e is a practical guide to the delivery of health care in rural and remote Australia. Drawing on personal experiences of rural and remote practitioners, historical accounts, literature analysis and epidemiology, this frank and engaging text examines the economic, social and political forces that shape healthcare in rural and remote Australia. With limited current resources to support studies in rural and remote healthcare, this title bridges the gap by offering valuable insights into Indigenous life and social determinants of health through the use of storytelling. It is the perfect guide for anyone working in or planning to work in rural, remote or Indigenous Australia; and for those undertaking cultural studies, or social policy. Only text covering both rural and remote health in Australia Placement preparation with StudentConsult video interviews of experienced rural and remote practitioners providing first-hand experience of rural and remote practice Pause and Think questions provide a framework to apply learned knowledge to practice Pause and think question boxes train the reader to critically assess and apply concepts to practical situations. New Chapter: Working with Indigenous Australians - Written by Shannon Springer, describes how to consult with

Indigenous patients and draws on his experience in clinical practice. It offers consultation signposts and practical principles for working with Indigenous Australians. New Chapter: Remote health practice - Written by Sue Lenthall, this chapter examines the differences and commonalities between the remote communities and then applies this information to a case study on 'a day in the life of a remote area nurse'. It presents a remote client consultation model and a StudentConsult audio consultation between a nurse and a distant doctor, as well as tips for working in remote practice. The audio consultation gives a first-hand account of the experience of a remote area nurse managing an emergency case. Video and audio content - video interviews of experienced rural, remote and Indigenous health practitioners as well as students. The videos contain first-hand experience of rural and remote practice as well as tips to help prepare those new to rural or remote practice.

Artificial Life and Computational Intelligence Jan 01 2021 This book constitutes the proceedings of the Second Australasian Conference on Artificial Life and Computational Intelligence, ACALCI 2016, held in Canberra, ACT, Australia, in February 2016. The 30 full papers presented in this volume were carefully reviewed and selected from 41 submissions. They are organized in topical sections named: mathematical modeling and theory; learning and optimization; planning and scheduling; feature selection; and applications and games.

Omega Fatty Acids in Brain and Neurological Health Jun 06 2021 Research has clearly established a link between omega fatty acids and general health, particularly cardiovascular health. Omega Fatty Acids in Brain and Neurological Health, Second Edition, illustrates the importance of omega-3 fatty acids in longevity, cognitive impairment and structure and function of the brain's neurons and also the adverse effects of omega-6 fatty acids on neurological function. This book encompasses some of the most recent research on the links between omega fatty acids and the developing brain, aging, dementia, Alzheimer's disease and multiple sclerosis, including the role of omega-3 fatty acid supplements on hippocampal neurogenesis, substantia nigra modulation,

migraine headaches, the developing brain in animals, sleep and neurodegenerative diseases. This completely updated second edition focuses on the counterbalancing dietary and tissue omega-6 fatty acids as well as it studies the effects in pregnancy and early infancy, animal model studies and autoimmune neurological diseases. Provides a comprehensive introduction to omega-3 and omega-6 fatty acids in neurological health and directions for future research Features novel focus on the adverse effects of omega-6 fatty acids on neurological function and the counterbalancing of dietary and tissue omega-6 Illustrates the importance of omega-3 fatty acids in longevity and cognitive impairment Features new chapters on early effects in pregnancy and early infancy, animal model studies and autoimmune neurological diseases Discusses links between omega fatty acids and the developing brain, aging, dementia, Alzheimer's disease and multiple sclerosis, including the role of omega-3 fatty acid supplements

Understanding Australian Construction

Contractors Sep 28 2020 This book will provide emerging construction professionals with insights and information helpful for a successful career in the Australian construction industry. This work fills a critical gap and is written by two authors with decades of experience immersed in current issues. It provides a starting point for the next generation of Australian construction contractors. Beginning with an overview of the industry, the chapters explore winning work, project operations, financial management, people skills and selling a successful business. The authors use case studies to enrich the content and include reviews and commentaries on some of the legendary management books. In addition, readers of the book will find answers to essential industry questions: Why is construction one of the best industries in Australia? What is its most significant conflict? Which are the three most consistently profitable sectors? What are the essential ten questions to answer for standardising practices? Is work acquisition more art or science? Is it a good idea to fire a client? Why? How to identify and address the office - field conflict? What is the job cost format for unifying project stakeholder information?

What are the best key performance indicators for a construction contracting firm? What alignments are needed in general hiring and personnel management processes? What is the process in identifying and implementing a best practice? How do you value the market price for a construction firm? This book should be read by anyone entering the built environment sector in Australia. Universities, Colleges and TAFEs can use this book in various construction business and operations management courses. Supporting materials are available through a website.

Emergency Medicine Nov 30 2020 Emergency Medicine: The principles of practice, 5th edition is a practical guide to assist doctors and other health professionals with patients presenting with acute problems. With contributions from over 60 eminent emergency physicians, doctors and other health professionals, the book provides the most up-to-date coverage of treatment and management in acute medical care including resuscitation, diagnosis, investigations, treatment and further care. Emergency Medicine, 5th edition contains essential information and provides a quick reference tool for emergency physicians, hospital residents, paramedics, ambulance officers, nurses and general practitioners, as well as students of these disciplines. Coverage of important controversies with evidence based recommendations. Editor comments contained in relevant chapters to provide clinical tips and advice for practice. Increased coverage of topical issues such as deep vein thrombosis (economy class syndrome) and street drugs. Practical rapid reference appendix. Detailed glossary and index. Expanded coverage of ultrasound in emergency medicine New BLS/ALS guidelines Expanded coverage of administration and management New material on envenomation and psychiatry New chapter on rural, indigenous and remote emergencies New chapter on advanced nursing roles New chapter on students guide to the emergency term New chapter structure design to minimize repetition; reorganized hierarchy to highlight important information; pearls & pitfalls in boxed out sections integrated throughout text; differential diagnosis summary tables and flow diagrams at the end of each chapter

Australian Football Feb 02 2021 "From basic

ball handling to more challenging ruckwork, Australian Football: Steps to Success provides full technical guidance. Carefully selected drills speed the learning process and help monitor progress. You then apply those skills on the field with the tactical approaches essential to commanding every facet of the game. The final training guidelines ensure that practice sessions are varied, efficient and fun while physically preparing players to execute the skills and withstand the rigors of one of the most challenging team sports."--Jacket.

Promoting Health Oct 30 2020 Promoting Health examines the social, environmental, cultural and psychological determinants of health and illness and the role that primary health care has in addressing health inequalities and the broad range of skills that health practitioners need to address this issue. In this new edition, the authors have uniquely utilised two fundamental tenets central to all health promotion practice and developed key features from both the World Health Organization's Ottawa Charter for Health Promotion and the International Union for Health Promotion and Education's Core Competencies for Health Promotion. Drawing on internationally recognised health promotion frameworks, this text provides an essential toolkit for health promotion theory and practice for students across a broad range of disciplines. Putting the Ottawa Charter into Practice - illustrates the relevance and application of the Ottawa Charter for Health Promotion to practice IUHPE Core Competencies for Health Promotion - outlines the relevant core competencies and how to achieve these skills EVOLVE

RESOURCES: This new edition features student and instructor evolve resources to enhance your teaching and your student's learning. Student and Instructor Resources Reflective Questions at the end of each chapter Insights - extra questions with answers to encourage self-directed learning Additional Student Activities - further learning and study aids for each chapter Instructor only Resources Facilitator & Lecturer Guide provides direction for learning activities to incorporate into your teaching Visit <http://evolve.elsevier.com/AU/Talbot/promotinghealth/> to find out more Identification of IUHPE Core Competencies For Health Promotion in all chapters 'More to explore' sections at the end of

each chapter featuring additional readings and web links Updates to current policy and practice initiatives References embedded in each chapter to encourage readers to explore topics in more detail Includes eBook with print purchase on evolve

Visual Languages (VL 2000) Apr 23 2020 This text contains the papers from the 2000 IEEE International Symposium on Visual Languages (VL 2000). It covers: software and information visualization; visual query languages; theory of visual languages; visual language design issues; evaluation of visual languages; and more.

Foundations of Nursing: Enrolled Nurses

Nov 11 2021 Designed for the Diploma of Nursing, Foundations of Nursing, Enrolled Nurses, Australia and New Zealand edition is mapped to the HLT54115 training package competencies, and aligns to the revised Standards for Practice for the Enrolled Nurse. Written to equip the enrolled nurse with current knowledge, and basic problem-solving and critical-thinking skills to successfully meet the demanding challenges of today's health care, the text clearly explains concepts and definitions, and scaffolds knowledge. The student-friendly text provides a clear and fresh approach to the study of nursing; it is straightforward and heavily illustrated with colour photos of procedures.

Biodiversity Oct 18 2019 Publisher's description. Australia's experience in community-based environmental repair is unique in the world, with no shortage of analysis by bureaucrats, academics and environmentalists. This collection of 17 case studies gives a view from ground level. It includes heroic accounts of families who changed their way of farming and their relationship to the land so significantly they found they could stop hand-feeding stock during a drought and see the bush coming back. It describes the experience with &'bush tenders', which were oversubscribed, as farmers competed with each other for stewardship payments to manage their grazing lands for endangered ground-nesting birds as well as beef and wool. And it tells of a group of wheat growers who plant patches of grassland for beneficial insects that save them tens of thousands of dollars a year in pesticide bills. The case studies arose from a meeting of 250

farmers, foresters and fishers from all Australian states, who met in Launceston as guests of the community group Tamar Natural Resource Management to reflect on the question: &'Is it possible to be good environmental managers and prosper in our businesses?' As well as tales of environmental hope, there are also messages about the limits of duty of care, the need to share the costs of achieving society's expectations, and the possibility of learning from unlikely places. Biodiversity: Integrating Conservation and Production includes the seven &'Tamar Principles', distilled by the delegates from the meeting for those on the front line.

Foreign Agricultural Economic Report Apr 16 2022

Learning Aid to Accompany Basic Marketing Oct 10 2021

Microelectronics Education Aug 28 2020 This is the third edition of the European Workshop on Microelectronics Education (EWME). A steady-state regime has now been reached. An international community of university teachers is constituted; they exchange their experience and their pedagogical tools. They discuss the best ways to transfer the rapidly changing techniques to their students, and to introduce them to the new physical and mathematical concepts and models for the innovative techniques, devices, circuits and design methods. The number of abstracts submitted to EWME 2000 (about one hundred) enabled the scientific committee to proceed to a clear selection. EWME is a European meeting. Indeed, authors from 20 different European countries contribute to this volume. Nevertheless, the participation of authors from Brazil, Canada, China, New Zealand, and USA, shows that the workshop gradually attains an international dimension. The 20 century can be characterized as the "century of electron". The electron, as an elementary particle, was discovered by J.J. Thomson in 1897, and was rapidly used to transfer energy and information. Thanks to electron, universe and micro-cosmos could be explored. Electron became the omnipotent and omnipresent, almost immaterial, angel of our World. This was made possible thanks to electronics and, for the last 30 years, to microelectronics. Microelectronics not only modified and even radically transformed the

industrial and the every-day landscapes, but it also led to the so-called "information revolution" with which begins the 21 st century.

Lifespan Development 2E Australasian Dec 24 2022 Childhood, 2nd Australasian edition explores the physical, cognitive and social development of children within Australian and New Zealand context. The text's comprehensive theory coverage includes the latest local and international research in this ever evolving field, and is perfectly complemented by numerous physical and mental health applications within local psychological, educational and allied health settings. A key strength of the text and its extensive accompanying online resources is its integrated coverage of cross-cultural and indigenous issues unique to the multicultural societies of Australia and New Zealand. It is an ideal resource offering for undergraduate students in both countries in order to enhance understanding of child development, from conception through to adolescence.

Lifespan Development Jan 25 2023

Public Health Practice in Australia Jan 13 2022 Public Health Practice in Australia offers a thorough introduction to what public health practitioners do, and the 'effort' involved in improving the health of the public. This second edition has been fully revised and updated in line with current policies and practice. It highlights common threads that underlie seemingly disparate activities, ideas and entities that comprise the organised effort of public health practice. The emphasis is on securing and maintaining the conditions in society that enable people to live healthy and fulfilling lives. The authors examine the impact of historical, social, economic, environmental and political factors on the health of individuals, communities and populations. Taking an applied, multidisciplinary approach, they outline the strategies and tools that public health practitioners use to improve health outcomes: identifying infrastructure needs in the workforce, public and private sector organisations, and in regulation; gathering, analysing and using health data; applying interventions in health policy, provision of health services and health promotion. Public Health Practice in Australia draws on current international and Australian research and the interwoven case studies make the theories and

concepts come alive. It is a valuable resource for students and professionals across the health sciences including public health, medicine, environmental health, health promotion, health information management and health administration. 'The book is impressive in the completeness, clarity and consistency of the material covered, and for the way in which many of the theoretical issues are related to current practice. An extremely useful and valuable reference for both students and practitioners alike.' - Thomas Tenkate, *Environmental Health Design and Technology for Children* Sep 21 2022

Design and technology education is now an established field of study in primary schools and in many early childhood centres. Authors Marilyn Fleer and Beverley Jane offer the definitive text on this curriculum area. *Design and Technology for Children 3e* is a comprehensive and innovative account of teaching and research in design and technology education. It gives pre-service and in-service teachers opportunities to reflect upon and further develop their understanding of technology and technological knowledge, and to consider several different approaches in a practical and interactive way. The third edition has been written to reflect current research and practice in design and technology education for Australian children and pre-service teachers.

Children's Self-determination in the Context of Early Childhood Education and Services

Dec 20 2019 This book investigates the position of young children's self-determination within a range of social contexts, such as education, social care, mass-media, health, politics, law and the family. It brings to the fore the voices of the children in the present, with their interests, agendas and rights. Based on original primary research, the chapters tackle hegemonic discourses on children's self-determination as well as current policies and practices. They address a broad range of topics, from the planning of role-play to national policies, from the use of digital technologies for pedagogy to children's health and well-being, and from democratic practices in the classroom to the preservation of traditional family values. The book presents case studies to unravel how childhood and young children's self-determination are constructed at the

intersection with intergenerational relationships. Coming from different disciplines and using a diverse range of methodological traditions, the contributions in the volume eventually converge to generate a rich, complex and multi-layered analysis of contemporary cultures of childhood and young children's rights.

Social Identities of Young Indigenous People in Contemporary Australia Dec 12 2021

This volume is about the social identities of young Indigenous people in contemporary Australia, based on fieldwork in the rural community of Yarrabah, in Queensland. This case study of Yarrabah is based on seventeen ethnographic interviews with women and men in their twenties. With the aim of exploring how diverse social discourses have influenced the social identities of young Indigenous people in contemporary Australia, this book represents the life histories of these young people in Yarrabah in the context of both the institutions with which they interact and the everyday shape of life in Yarrabah. This volume also provides new material for discussion of the ways in which Indigenous value systems, broadly understood by the participants to be based on collectivism, constantly come into conflict with Western values based on individualism. While the young Indigenous people of Yarrabah do continuously interact not only with multi-cultural Australia but also with global influences, they are constantly aware of their own distinctiveness in both contexts.

Early Childhood Leadership in Action Jun 25

2020 Leadership is a core skill required by all early childhood educators, whatever position they hold - whether leading their own ethical and professional practice or leading others. From understanding ethical frameworks to managing change, and from quality assurance to working with teams, families and the wider community, the most effective early childhood leaders act with confidence, flexibility and creativity. In this book early childhood researchers Elizabeth Stamopoulos and Lennie Barblett provide a new model for leadership. Recognising that leadership is both an individual and collective endeavour, multi-layered and multidimensional, the authors have distilled core tasks of leadership that are explored in detail in each chapter: *Understanding and

conceptualising theories of leadership *Leading in times of change * Advocating for high quality pedagogy and practice *Developing strong communication skills * Leading through digital technology and media * Developing effective teams * Building positive relationships with families and the wider community * Embedding Indigenous perspectives * Embracing evidence-based research And * Leading ethical practice. Featuring the perspectives of leaders from diverse settings, together with reflection exercises and discussion questions throughout, this is an essential book for both pre-service and in-service early childhood educators. 'The authors...are commended for their commitment to shining a light on a wide range of research, theories and issues concerned with leadership and the early childhood profession. ' -- from the foreword by Catharine Hydon and Dr Anne Kennedy

Integrated Approaches in Information Technology and Web Engineering: Advancing Organizational Knowledge Sharing

Apr 04 2021 Provides a collection of authoritative articles from distinguished international researchers in information technology and Web engineering.

ACCCN's Critical Care Nursing Sep 09 2021 Developed in conjunction with the Australian College of Critical Care Nurses (ACCCN), the text has been written and edited by the most senior and experienced critical care nursing clinicians and academics across the region. ACCCN's Critical Care Nursing is a resource that will foster the development of skilled and confident critical care nurses. This comprehensive text provides detailed coverage of a number of specialty areas within critical care nursing including intensive care, emergency nursing, cardiac nursing, neuroscience nursing and acute care. It will encourage students to be reflective practitioners, ethical decision-makers and providers of evidence-based care. Written by expert clinicians, academics, and educators Pedagogically rich chapters with learning objectives, key terms, case studies, practice tips, article abstracts, learning activities, research vignettes Heavily illustrated and referenced Reflects current clinical practice, policies, procedures and guidelines The text has a

patient-centred approach and will provide students with a sound knowledge base and critical thinking skills Image bank of all illustrations from the text will be available to lecturers for teaching

Information Security and Privacy Jul 07 2021

This book constitutes the refereed proceedings of the Second Australasian Conference on Information Security and Privacy, ACISP'97, held in Sydney, NSW, Australia, in July 1997. The 20 revised full papers presented were carefully selected for inclusion in the proceedings. The book is divided into sections on security models and access control, network security, secure hardware and implementation issues, cryptographic functions and ciphers, authentication codes and secret sharing systems, cryptanalysis, key escrow, security protocols and key management, and applications.

Social Security at the Dawn of the 21st Century May 25 2020

Presenting a periodic overview of the most significant developments and trends in the field of social security has become, for the International Social Security Association, a tradition and a firm commitment. Benefiting from the vast quantity of information uniquely available to the ISSA, its triennial review takes stock of the current state of social security world wide and focuses, through expert analyses, on some of the most pressing social security issues. Social Security at the Dawn of the 21st Century, the outcome of the most recent review, is intended to significantly extend the access of an international readership to accurate and up-to-date information and analyses on social security, which has without question developed during the twentieth century into one of the most important publicly financed and administered institutions in modern society. The chapters are grouped into two parts. Part one treats subjects related to policy trends and regional developments, with special emphasis on such important issues as redesigning social security programs, new management practices, and the informal care dilemma. It features major aspects of developments in Asia-Pacific and Latin America. Part two focuses on specific program areas, with special emphasis on problems and reforms in employment policy, pension systems, and public disability schemes.

Information is also provided on new approaches to ensuring adequate access to health care and on policies in response to changes in family structures as well as an recent experience with social assistance programs. Dalmer D. Hoskins has held the post of Secretary General of the International Social Security Association (ISSA) since 1990. Before his election to this post, he held positions in the United States Social Security Administration and the Department of Health and Human Services. Donate Dobbernack is currently chief of communications and publications within the International Social Security Association (ISSA). Before assuming responsibilities in this area, she was chief of the technical activities program of the Association, dealing with international enquiries and studies on various aspects of social security and related fields. Christiane Kuptsch is a research officer with the International Social Security Association (ISSA) and the editor of the quarterly publication Trends in Social Security. She is a regular contributor to the Encyclopaedia Britannica on the issue of developments in social protection.

Lifespan Development Feb 26 2023

Publisher's description. "Lifespan Development : a Chronological Approach, Second Australasian edition, explores human physical, cognitive and social development within an Australian and New Zealand context. The text's comprehensive theory coverage includes the latest local and international research in this ever-evolving field, and is perfectly complemented by numerous physical and mental health applications within local psychological, allied health and educational settings. A key strength of the text, and its extensive accompanying online resources, is its integrated coverage of cross-cultural and Indigenous issues unique to the multicultural societies of Australia and New Zealand. It is an ideal resource offering for undergraduate students in both countries in order to enhance understanding of human development - from conception through to the end of life."

Australian National Bibliography: 1992 Oct 22 2022

Entrepreneurs Navigating a Universe of Disruption May 05 2021 This book details the exploratory stages of a research study that produced a framework for entrepreneurial

endeavour and enterprise. It presents an unfolding discussion, throughout its chapters, regarding the entrepreneurial nature potential within us all, and the modes by which those involved in such activity, and associated innovative discoveries, can be informed by the skills and experience already in their possession. The book also provides, through its structure, a tool by which the entrepreneur, innovator, educator, student or those yet-to-be involved in the entrepreneurial arena can plan for the yet-to-be known eventualities of such endeavour. The parabolic scramble framework is backgrounded across the discussion of entrepreneurship and the necessity to deal with the tangible and intangibility of any venture, as well as other considered aspects that the entrepreneurial journey engenders. Dr. Gerard Anthony Reed is a Senior Lecturer in Screen Business at the Australian Film Television and Radio School (AFTRS) and experienced in economic development with an emphasis on entrepreneurial and innovative screen media business practices. Gerard has written, directed, and produced factual programming, with a specialization in documentary formats.
