For soldiers on both sides of the American Civil War, religion was a great sustainer of morale. INTERNATIONAL BESTSELLER • In this modern classic, the acclaimed New York Times bestselling author explores the incomprehensible depths of madness and captures the insanity of violence in our time or any other. Patrick Bateman moves among the young and trendy in 1980s Manhattan. Young, handsome, and well educated, Bateman earns his fortune on Wall Street by day while spending his nights in ways we cannot begin to fathom. Expressing his true self through torture and murder, Bateman prefigures an apocalyptic horror that no society could bear to confront. "A masterful satire and a ferocious, hilarious, ambitious, inspiring piece of writing.... An important book." —Katherine Dunn, bestselling author of *Geek Love* Look for Bret Easton Ellis's new novel, *The Shards*, coming in January. A collection of documents supplementing the companion series known as "Colonial records," which contain the Minutes of the Provincial council, of the Council of safety, and of the Supreme executive council of Pennsylvania. The abstracts of wills were made from the originals in the office of the Secretary of the State, and where they are recorded a reference to the book of record is given. The wills are arranged in alphabetical order by the testators or intestates names. Thi This stimulating workbook is aimed at committed writers and students of creative writing who want to engage with ideas about writing and develop their craft and practice. Drawing on the expertise of a range of professional and award-winning contributors, the focus is on writing as 'process', moving from practical guidance on 'form and style' through to using themes such as 'body' or 'house' as a creative springboard. Including specially designed writing exercises and illustrative extracts, this innovative guide will inspire and challenge. It is an essential resource for anyone who wishes to master the art and practice of creative writing and galvanise their talent to professional and publication level. Contributions by: Linda Anderson, Theodore Deppe, George Green, Graeme Harper (aka Brooke Biaz), William Herbert, Lee Martin, Jenny Newman, Jayne Steel and a Foreword by Patricia Duncker. This book brings together a huge range of material including academic articles, film scripts and interplanetary messages adrift on space probes with supporting commentary to clarify their importance to the field. Communication Studies: The Essential Resource is a collection of essays and texts for all those studying communication at university and pre-university level. Individual sections address: * texts and meanings in communication * themes in personal communication * communication practice * culture, communication and context * debates and controversies in communication. Edited by the same teachers and examiners who brought us AS Communication Studies: The Essential Introduction, this volume will help communications students to engage with the subject successfully. Its key features include: * suggested further activities at the end of each chapter * a glossary of key terms * a comprehensive bibliography with web resources. A unique combination of theoretical knowledge and practical analysis experience Derived from Yoshihide Hase's Handbook of Power Systems Engineering, 2nd Edition, this book provides readers with everything they need to know about power system dynamics. Presented in three parts, it covers power system theories, computation theories, and how prevailed engineering platforms can be utilized for various engineering works. It features many illustrations based on ETAP to help explain the knowledge within as much as possible. Recompiling all the chapters from the previous book, Power System Dynamics with Computer Based Modeling and Analysis offers nineteen new and improved content with updated information and all new topics, including two new chapters on circuit analysis which help engineers with non-electrical engineering backgrounds. Topics covered include: Essentials of Electromagnetism; Complex Number Notation (Symbolic Method) and Laplace-transform; Fault Analysis Based on Symmetrical Components; Synchronous Generators; Induction-motor; Transformer; Breaker; Arrester; Overhead-line; Power cable; Steady-State/Transient/Dynamic Stability; Control governor; AVR; Directional Distance Relay and R-X Diagram; Lightning and Switching Surge Phenomena; Insulation Coordination; Harmonics; Power Electronics Applications (Devices, PE-circuit and Control) and more. Combines computer modeling of power systems, including analysis techniques, from an engineering consultant's perspective Uses practical analytical software to help teach how to obtain the relevant data, formulate 'what-if' cases, and convert data analysis into meaningful information Includes mathematical details of power system analysis and power system dynamics Power System Dynamics with Computer-Based Modeling and Analysis will appeal to all power system engineers as well as engineering and electrical engineering students. The definitive edition of Thomas Jefferson's papers from the end of his presidency until his death continues with Volume Two, which covers the period from 16 November 1809 to 11 August 1810. Both incoming and outgoing letters are included, totaling 518 documents printed in full. General themes include Jefferson's financial troubles, which eventually led him to loan himself a large sum of money he was managing for Tadeusz Kosciuszko; his preparations to face a lawsuit stemming from his decision as president to remove Edward Livingston from a valuable property in New Orleans; other legal complications involving his landholdings and the settlement of estates he had inherited long before; his plans to breed merino sheep and share them gratis with his fellow Virginians; and his ongoing interest in the Republican party's success. Highlights include a long list of books on agriculture that Jefferson probably compiled to guide the Library of Congress in its purchases; descriptions of inventions by Robert Fulton and more obscure figures such as the New Orleans engineer Godefroi Du Jareau; Jefferson's draft letter criticizing the Quakers as unpatriotic, much of which he later deleted; the letter in which he ordered a set of silver tumblers that have become known as the Jefferson Cups; and an important treatise on taxation by the distinguished French political economist Pierre Samuel Du Pont de Nemours, published here for the first time. Volume 23 of the Naval Chronicle (1810) focuses on the unsuccessful Walcheren Campaign of 1809 and the capture of Guadeloupe.
